

INVESTIGATION REPORT – Team 4

Investigation Site	Derby Gaol
Investigation Date	9 th April 2005
Report By	Andy Fazekas
Team Members	Andy, Henry, Kevin, Tracey

This report is taken from Andy's notes at the time and needs to be included with Tracey's findings to give an overall picture of Team 4.

Vigil 1: Exhibition Room

22:00 Investigation begins.

22:55 Team hears the sounds of a chain being pulled through wood coming from the wooden unit Andy is sitting on. Andy thinks he moving slightly or his coat catching the chain could have caused it. Upon inspection this is not the case so although everyone heard the sound the cause is unexplained.

Break Period: Control Room

No activity for our team.

Vigil 2: Condemned Man's Cell

Nothing of note

Vigil 3: Debtor's Cell

23:25 EMF reading stay at middle reading.

23:55 EMF meter spiking off the scale constantly this is recorded by camcorder (hopefully).

00:15 Camcorder switching itself off.

00:20 Kevin and Andy pick up smell of tobacco smoke in one area of cell.

00:30 Using two different EMF meters they both start spiking on numerous occasions.

Séance

I felt nothing throughout this though when asking for a sign the old wooden door behind me did creak and open slightly. Upon investigation it is suggested this could have been caused by the wind as the passage opens to the outside, however the door is at least two inches thick solid wood ?

Ouija

Opposed as I am to using these I really wanted to talk to someone from history in order to learn more. The glass did move but ever so slowly not like Most Haunted.

I am not sure if anyone was ever there but have no answers to the glass moving either as I am sure it was no one round the table.

General

Group exercise – still kicking myself over being allowed to look silly

Derek Acorah impression – best forgotten

INVESTIGATION REPORT – Team 4

Investigation Site	Derby Gaol
Investigation Date	9th April 2005

Overall Rating

It was ok, maybe expectations were high, good to meet Norwich group we can certainly do more investigations with them they are very much like us and we like them.
