

INVESTIGATION REPORT – Team 1

Investigation Site	Manchester Place
Investigation Date	11 th April 2008
Report By	Andrew Fazekas
Team Members	Andy, Mark (DYPC Staff Member)

Séance: DYPC Hall – 21:27 to 21:55

During the séance Andy felt a cold breeze on and off on his left arm and in his hip. Had a picture in his mind of an old woman with grey hair (in a bun) outside her cottage standing at the end of her garden path and next on her right hand side is a large rose bush with red and pink roses. The fence around the garden is made up of wooden posts. Andy did ask Steph to touch his arm as he felt so cold and Steph reported that Andy's arm was cold. After the séance Andy reported that his left arm was very painful near the elbow (this could have been caused by holding the arms aloft for thirty minutes).

DVD camera picks up two orbs. Orb one floats down from the ceiling (probably piece of ceiling). Orb two goes across the hall above the group (probably an insect).

Vigil 1: DYPC Meeting Office – 22:25 to 23:10

22:23 EMF reading shows spikes emanating from the middle of the floor in the office. Temperature reading is 15°C around the office and 14.8°C in middle of the office. A further check with the stud meter shows nothing to evidence this.

10.32 The sound of feet shuffling can be heard by Andy. At the time Marks was resting his feet on a chair.

22:38 Room temperature has dropped to 14.8°C and Mark reports that the right side of his face feels cold.

22:39 A ping sound is heard by both members of the team and no cause is found.

22:40 Another ping sound this time by the PC but it is switched off. Also there is the sound of a clock ticking but there is no clock in the room. Mark hears a cracking sound from above the office.

22:45 The sound of a thud is heard above the team. This is followed by a light anomaly seen going left to right in the rear entrance exit area of the office. Two more sounds are heard that are indescribable.

22:03 Tapping sounds like a clock ticking fast and then slow are heard. Mark hears the sound of banging coming from the radiator twice.

22:08 Two loud hollow knocks heard on the side of the wall facing the team who are sat in the office chairs. Mark begins to feel uneasy sitting next to the desk area.

The sounds heard in this session are also picked up on digitised recordings including sounds not heard during the vigil. One orb is caught on DVD.

Vigil 2: DYPC Main Hall - 23.42 to 00:27

23:50 The sound of a women inhaling next to Andy's right side startles him making him jump. And EMF reading taken shows no readings and the temperature is 17.2°C.

23:55 Mark reports that he feels the door glass pane is moving.

23:56 A tap is heard by the fire exit by Andy that sounds like a stone hitting the ground.

INVESTIGATION REPORT – Team 1

Investigation Site Manchester Place

Investigation Date 11th April 2008

- 00:03 The team hear a tap coming from the kitchen area. Mark hears the sound of children playing. This is followed by Andy hearing two creaking footsteps on the floor.
- 00:04 Andy hears someone outside and Mark reports that he can clearly hear footsteps that have come from the door adjoining the project office as if someone is walking towards the middle of the hall floor where they stop.
- 00:06 Sounds of cats fighting heard outside.
- 00:10 Mark feels there is someone in the hall watching the team.
- 00:11 Tap heard in Kitchen area.
- 00:20 Another tap is heard in the Kitchen area. Temperature reading is 16.8°C near the team and 17°C in the centre of the hall. EMF reading shows no spikes. A red light is seen by Andy travelling across the hall and on the door glass to the adjoining office.
- 00:28 Tap heard halfway down the right side of the hall by Andy.

Vigil 3: Pioneers Hall – 01:00 to 01:45

- 01:00 Team 1 is by the fire exit in the corner of the hall. Temperature reading is 12°C and EMF reading shows nothing.
- 01:05 A bang is heard behind Team 1.
- 01:10 Taps heard from fire exit door behind team 1. Temperature reading is 12°C either side of Andy and 11.9°C in front. EMF shows no activity.
- 01:35 Temperature reading taken 12.7°C and EMF shows no spikes.
- 01:43 Orb seen by Andy going upwards from the middle of the hall floor.

Vigil 2: DYPC Project Office – 02:25 to 03:10

- 02:25 Temperature Reading 17°C and EMF no spikes.
- 02:30 Security light comes on in office and then goes off.
- 02:38 Security light comes on again and Andy has the impression of music in the distance.
- 02:43 A thud is heard followed by a heavy footstep.
- 02:45 Security light comes on and goes off. Temperature reading taken 16.5°C. EMF no spikes.
- 02:50 Tap heard in office next door where there are no teams.
- 02:54 Footsteps of someone walking heard coming from the hall.
- 02:55 More sounds of movement heard coming from hall. Temperature 16.2°C. EMF nothing.
- 03:00 Sound of glass chinking is heard.
