

INVESTIGATION REPORT – Team 2

Investigation Site	Luton, Galley Hill
Investigation Date	28 th August 2009
Report By	Stephanie Lawn
Team Members	Stephanie, Billie & Carla

Pre-Vigils

When walking from the car park to the top of Galley Hill, Steph gets 'Granada' repeatedly in her mind.

Equipment

Digital Camera

Thermometer

Pen & Notebook

Vigil 1: 21:06 to 21:55

21:06 Steph measures the temperature at 8°C.

21:10 Steph hears 'Samuel' in her head then 'Samuel rides here'.

21:16 Carla begins to feel very drowsy and felt that she could fall asleep despite the cold.

21:19 Billie began to see images of soldiers marching. They appeared to be World War 1 soldiers. Billie kept getting the name 'Somaston'. Billie felt the sensation of a wound in the chest area.

21:20 Steph gets the urge to look to her right. She does and can smell a soft musk aroma which lasts for several seconds.

21:23 Billie sensed the presence of two highway men; one with a grey horse and one with a brown horse.

21:24 Billie felt a sensation to the back of her head; a tightening to the area on the left side behind the ear.

21:27 Steph notes that her ears are ringing.

Billie heard a footstep which consisted of stones and a clicking noise; but this was not Steph or Carla as they had not moved. Billie began to see images of three men; travellers who were together and died together here. This was a recent period within the last ten/twenty years. They died following beating /torture in retribution.

21:29 Billie kept seeing the year 1997 and the face of one traveller with brown curly hair.

21:30 Carla realised that if she sat back in her chair she felt very cold, but if she leant forward it was much warmer. Carla had her back to an area with some trees and felt that the coldness might be because of a paranormal presence as there was such a marked difference in temperature.

21:31 Steph can hear owls hooting and screeching in her mind.

21:34 Billie felt something pushing the back of her shoulders and sensed the name 'Loughton' and saw a throat having been cut.

21:39 Steph is starting to feel very cold and measures the temperature as 5°C. She notes the wind has picked up significantly.

INVESTIGATION REPORT – Team 2

Investigation Site Luton, Galley Hill

Investigation Date 28th August 2009

Séance

Billie felt the tightness at the back of her head again on the left hand side. Billie then heard someone walking. Billie looked to the left. Billie noticed that Bill also looked to the left. No-one was there.

Vigil 2: 22:20 to 23:10

22:21 Steph measures the temperature as 8°C.

22:29 Carla gets an image of gallows on top of the hill. It seemed to be a scene that had taken place in the past.

22:30 Steph gets the impression of a man sleeping under a tree opposite her. The tree is large and no longer there.

Billie heard people walking on stones. There were no stones in the area and no-one was walking about.

22:31 Steph has 'The bridges burned. The three bridges' come in to her head.

Billie sensed a very bad presence behind her. Billie did not turn around as Billie felt scared of this presence.

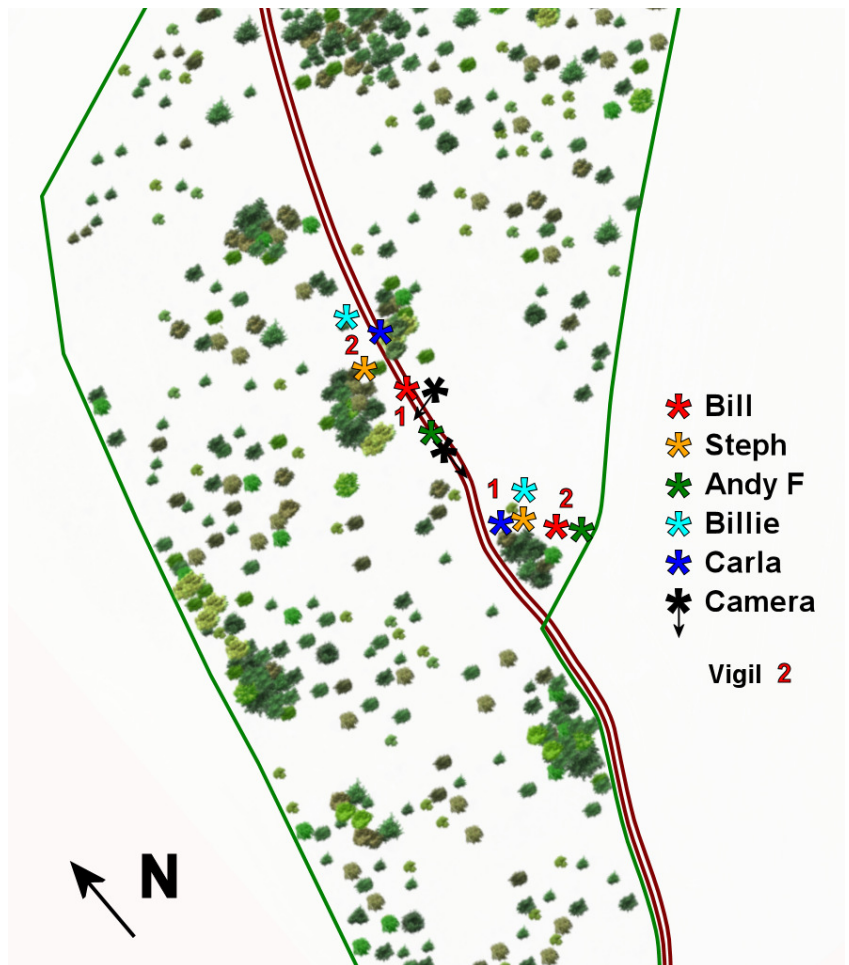

A small orange circular light was seen by Billie across the pathway just above ground level. Billie looked to the right to see if anyone was shining any torches/laser lights and no-one was. The light stayed for some moments only.

22:34 Billie continued to sense this very strong presence and the physical sensation of the left hand side back of the head continued to feel very tight.

Carla feels a choking sensation around her throat.

22:37 Carla feels a choking sensation around her throat again.

22:38 Billie felt a strong sense of fear; but this fear did not belong to the presence – Billie sensed it was the fear of others in relation to the spirit.

INVESTIGATION REPORT – Team 2

Investigation Site Luton, Galley Hill

Investigation Date 28th August 2009

Billie felt that this presence was angry and bitter and felt that his life had been robbed up here. Billie sensed that this man had been very bad and sensed he had been very sexually abusive towards women and children. This man had been short in height and was a traveller.

22:39 Steph sneezes.

22:41 Steph is finding it hard to concentrate as she is very congested with bleary eyes and itchy throat. She puts this down to hay fever and being sat in the long grasses.

22:45 Steph feels the area of the small trees to her front right is an important spot but she does not know why.

22:49 Carla hears a short scream coming from her left towards the direction the group had walked from.

22:50 Steph hears a noise in the direction back toward the way Team 2 came. She describes this as sounding like something being dragged twice over the rough ground and had a metallic clattering sound to it.

22:58 Carla can hear a note from a piano to her right down the hill which played a few times.

23:06 Steph notes that throughout the vigil there have been various small animal noises and has observed lots of aircraft lights in the sky.

Carla feels a choking sensation around her throat again

23:09 As Steph is sitting on her chair with her hands in her lap and her head bowed she hears a high faint high pitched scraping noise which appears to be coming from the walkie talkie on her lap. This lasts a few seconds before ceasing.
