

Derby Gaol

Team 4/NPEG Report – 9th April 2005

Taken from notes on the night by Tracy (NPEG) and Andy

Team 4: Andy Fazekas, Henry Wharton, Kevin Pope and Tracy Monger

Weather: Clear warm night.

Derby name meaning: Farmstead or village where deer are kept (deoraby 10th cent, Derby 1086).

Moon phase: Waxing quarter, first quarter. New moon @ 8th April on 20.32hrs

Team/members	Time	Room	Base readings	What Happened
Tracy	9.15	Day room		Headache, went outside and the headache Went, went back to day room and the it Came back.
Team 4 Kevin	Start 10.00pm	Museum Room/ Exhibition room	Base temperature 14.5°C EMF readings none	There was a very cold feeling and breeze coming from the back right hand corner of the room from underneath the display cabinet. @ 22.14 pm had feeling of something running up leg.
Andy	10.55pm			team hears the sounds of a chain being pulled through wood coming from the wooden unit Andy is sitting on. Andy thinks he moving slightly or his coat catching the chain could have caused it. Upon inspection this is not the case so although everyone heard the sound the cause is unexplained.
Tracy	10.27pm Finish 11.00pm			felt cold spot under display unit, on left hand side as facing door, EMF had a reading of 2.5-10 milligauss (orange)
Tracy				I have checked the camcorder footage of this Room and there appears to be some possible orbs/dust/moth and there is a light anomaly.
Team 4	Start 11.25pm	Debt cell	Base temperature 12.5°C EMF base reading 2-3 Lights (1.5-10)	From the middle of cell to 2ft from door readings of up to 10 milligauss, this base reading was done with two EMF meters. Kevin and Andy smelt a burning from middle Of cell where EMF meter was giving readings.
Andy	11.25pm			EMF reading stay at middle reading
Tracy	11.37pm			While sitting on the bench by window, felt like someone was there but stepping back and Was watching us, not sure if wanting to come closer.
Tracy	11.50pm			Had pain in lower back, really intense pain
Andy	11.51pm			Spikes on EMF meter, by the door area, this could indicate a disturbance in the Electronic Magnetic field.
Tracy	11.55pm			I felt really unwell, the whole of me not just the pains in my back.

Andy	11.55pm			EMF meter spiking off the scale constantly this is recorded by camcorder (hopefully)
Tracy and Henry	12.05am			Heard a clunk noise on windowsill, I checked the camcorder, was told to re-insert cassette which I did, but it worked for about 2 mins when I change cassette over.
Tracy	12.12am			Pain in the back was starting to ease.
Andy	12.15am			Camcorder switching itself off
Tracy	12.15am			Camcorder had turned off and said needed to re-insert tape and I did, turned camcorder so it was looking out of the window and it worked Fine after this.
Andy	12.20am			Kevin and Andy pick up smell of tobacco smoke in one area of cell
Andy	12.30am Finished at approx 12.30am			Using two different EMF meters they both start spiking on numerous occasions
Tracy			Camcorder	Orbs/dust captured.
Team 4 Kevin	Start 12.55am	Condemned Mans cell	Base temperature 12.5°C Emf base test Similar to Debt cell.	1.03am stood on the left hand side of the cell door and almost at once my ribs began hurting as thou I had been laughing very hard for several minutes, the pain was so unbearable that I moved half way down the cell and leant against the right hand sidewall.
Tracy	1.10am			I was sitting on the bench (closest to far end of cell) and saw a light near Henry (to right of me) on his right hand side, the atmosphere Completely changed, Henry also thought he Saw something.
Tracy	1.12am			I kept thinking I was seeing someone standing next to Henry.
Kevin	1.20am			The pain in the ribs left but my cheekbones ached so much from smiling and laughing!
Andy	finished at 1.50am			had nothing of note
Tracy			Camcorder	The tape would not play and keep say re-install the cassette, so this indicates that the tape is fault and it was not paranormal. This was the tape that was first used in the Debt Cell.
Team 4	Approx start 2.00am to Approx 3.00 am	Control room (day room)	No base Temperatures	No comments were made.
Andy				had no activity for our team.
Tracy		Outside while In control area		No activity or any footage on the camcorder.
Everyone	Approx 3.50am	Corridor near cells and toilets	Séance	The main door moved and creaked and several people heard this. Some people heard a noise coming from being us, in the area of the kitchen.

Andy				Séance – I felt nothing throughout this though when asking for a sign the old wooden door behind me did creak and open slightly. Upon investigation it is suggested this could have been caused by the wind as the passage opens to the outside, however the door is at least two inches thick solid wood?
Kevin	Approx 3.50am – 4.30am	Condemned Cell also Debt cell	Camcorder Footage	Condemned Cell have captured some possible orbs/dust, but have caught a bright light anomaly

Kevin's comments on the orbs in the corridor, he felt the reason for this phenomenon was that the corridor was acting as a chimney and drawing dust particles along and towards the camera, nothing of note was captured by him on digital camera.

Other investigations personal notes from Andy

Oujia board – opposed as I am to using these I really wanted to talk to someone from history in order to learn more. The glass did move but ever so slowly not like MH lol

I am not sure if anyone was ever there but have no answers to the glass moving either as I am sure it was no one round the table.

Group exercise – still kicking myself over being allowed to look silly

Derek Acorah impression – best forgotten

Overall rating - it was ok maybe expectations were high good to meet Norwich group we can certainly do more investigations with them they are very much like us and we like them.
