

Chiltern Green, Bendish, Ayot St. Lawrence, Codicote, Devils Dyke and Nomansland

Team 1 Report - 16th September 2005

Chiltern Green Road

We stopped near the bridge for about 10-15 minutes. Pictures produced orbs including an interesting one taken by Elaine showing one that appeared to be behind a bush in the background. (Awaiting Elaine's Picture)

Bendish

We split in to two groups and walked in opposite directions from the centre sign. Temp taken near the sign averaged at -7°C. (Steph, Andy, Sharon) Walk to the left of the sign temperature fluctuated from 4°C to -6°C. Walk to the right up to the house on the corner, significant wind coming round the bend (temp -9°C at lowest) but strong wind not present elsewhere along the road.

Codicote

Church of St. Giles. Team walked around the church. Sam reports seeing a light behind a gravestone (located North East when standing with back to the main church door) near one of the entrance gates. Jayne hears a noise inside the church when by the window to the left of the front

door (if facing the door). She described it as the sound of someone moving about. Jayne asked Lesley if she heard the noise and she stated she did not.

Devil's Dyke

Some members did not like this area. Sam felt as if she was being watched. Steph felt that the place was full of energy. She also felt the presence of a man who sort of 'trotted' up behind her and looked over her right shoulder. She also felt him walking with her again close behind her on her right but did not have any bad feeling from him. Jayne was taking EMF readings round Steph. The meter seemed to spike around her back and neck. The meter also spiked close to Sam. Sam and Steph also heard footsteps on the higher areas. This was put down to locals as male voices were also heard.

On walking down to the exit, Steph got the name 'George'.

Nomansland

On walking through the wooded area to the open common, orbs were caught on camera and a mist. On walking to the open common, Lesley said she was touched (like a tap/prod) on her hand. EMF showed no reading. Some areas were extremely cold, and the temp showed a reading of -15°C!
