

INVESTIGATION REPORT – Team 3

Investigation Site	Luton, The Biscot Mill
Investigation Date	4 th July 2007
Report By	Bill King
Team Members	Bill, Leana

Séance: Pool Room

Just before the séance Leana got the impression of a man in his mid 30s sitting at the open end of the bench which lies against the wall between the Pool Room and Main Bar. He was sitting with one leg higher than the other as if it was resting on the ball of his foot. He had his right elbow resting on this raised right leg and was hunched over as if concentrating on something in his right hand but she did not know what it was. He had dark hair and appeared to be wearing a suit. At times he seemed to be looking at something in his lap.

Experiment: Pool Room, Main Bar and Restaurant – Dowsing

Dowsing of the Pool Room and Main bar using both dowsing rods and the Hartmann Rod by both team members produced no results. The only noticeable thing was that as the dowsing ended at 01:47 Leana smelt bacon as she walked past the bar at the Pool Room end.

01:50 Using the dowsing rods in the Restaurant area produced a definite response. Most of the area was dowsed to no effect until, almost at the end of the dowsing session, I was walking past the Food Order Point when the dowsing rods responded. Walking east past the till produced a crossing of the rods in a very specific area right in front of the till. Walking the other way, west, produced the same response in exactly the same area. Walking towards the bar from the south again produced the same result. To test that it wasn't just me I tried again from the west this time with my eyes shut and starting about 2m from the till. Leana was guiding me to make sure I didn't walk into the bar or the nearby table and chairs. After a few steps Leana began to laugh at the same time as I felt the rods cross. On opening my eyes I again found I was by the till, in exactly the same spot. Trying one final time with the Hartmann Rod produced a 45° clockwise rotation in the same area whilst walking both west and east. All told the reactive spot was about 60cm across.

Vigil 1: Cellar – 02:20 to 03:01

I chose to sit by the door between the two cellars whilst Leana sits near the door to the secure cage. Lights are turned off.

02:29 A bright electric blue dot is seen by me to the right of Leana's head.

02:42 Measured temperature +17.5°C.

02:46 Bright yellow spot seen by me near three barrels to the left of Leana and in the opposite corner to that in which he was sitting.

02:56 Bright flash of light seen by me on the support beam that runs across the large cellar from the area of the entrance and barrel roll to the opposite wall. Flash covered almost the entire further half of the beam. Later checking showed that it was unlikely to have come from outside, through the barrel roll doors, as they are above the level of the beam and obscured by pipes.

03:01 Measured temperature +15°C.

INVESTIGATION REPORT – Team 3

Investigation Site Luton, The Biscot Mill

Investigation Date 4th July 2007

Vigil 2: Main Bar – 03:18 to 03:57

00:35 A temperature of +23°C was recorded earlier in the evening.

The team sit at the south end of the room by the doors to the restaurant.

03:18 Measured temperature +20.5°C.

03:33 Leana sees a bright blue light on the roof beams which appeared to be about 30cm across. The beams are in the centre of the room to the left of the entrance. They consist of several parallel wooden beams running east to west in an area about 2.5m across. The light was seen near the southwest corner.

Just after the blue light above, Leana saw a shadow go across the wall to the right of the disabled toilet.

03:34 Metallic tinkling sound heard which seemed to come from the corridor to the cellar (behind the bar and running north behind the Pool Room).

03:36 I saw the far end of the Pool Room go dark to the left of the door to the disabled toilet.

03:38 Same as 03:34 but it sounds more like gas escaping (the compressors in cellar were still on).

03:53 I see a shadow cross the sign to the right of the entrance.

Vigil 3: Restaurant – 04:03 to 04:51

For this vigil we sat in the long eating area to the south.

04:03 Measured temperature +21.5°C.

04:51 Measured temperature +21°C.

Nothing else to report during this vigil.
