

INVESTIGATION REPORT – Team 1

Investigation Site	Bolter End, Hanover Hill
Investigation Date	31 st July 2009
Report By	Stephanie Lawn
Team Members	Stephanie, Andy and Mark

Equipment Used

Sony DVD Camcorder.

Digital Sound Recorder.

Digital Camera.

EMF meter.

Temperature Gauge.

General Notes

Weather: Cloudy.

Visibility: Poor as it got dark quite quickly.

Ambient Sounds: Animals in nearby wood, Windy, Aircraft flying overhead.

Pre-Vigils

21:09 LPS members walk up the path to the top of Hanover Hill. They climb over two stiles and go through a kissing gate in to an open field area. As members stop to discuss the location where the path bends to the left, Stephanie can smell old dusty books.

21:10 Mark senses someone walking through the field to his right as Team 1 walk towards their first vigil site.

Vigil 1: Trackway – 21:20 to 22:00

21:20 In the direction he is facing, Mark sees yellow lights like fine lines all the way along the horizon where the trees meet the field. He sees these a few times and notes they only last for a few seconds. He thinks these may be from houses behind the trees.

21.25 Andy hears that sound of dog barking in the distance on his left. Andy takes an EMF reading showing no signs of paranormal activity. Andy's DVD camera was ineffective after five minutes as it seemed to get dark quickly and the infrared light Andy was using is insufficient for this situation.

Steph records the temperature as +12°C.

21:28 Steph gets an image in her mind of a beautiful black horse galloping across Hanover Hill. It looks sleek and shiny. Steph notes there is no rider and there doesn't appear to be any boundaries around.

21.29 Andy hears the sound of a dog again.

21.32 Andy hears the sound of dogs this time to his right in the distance.

21.35 Andy hears the sound of voices in the nearby woods to his right.

INVESTIGATION REPORT – Team 1

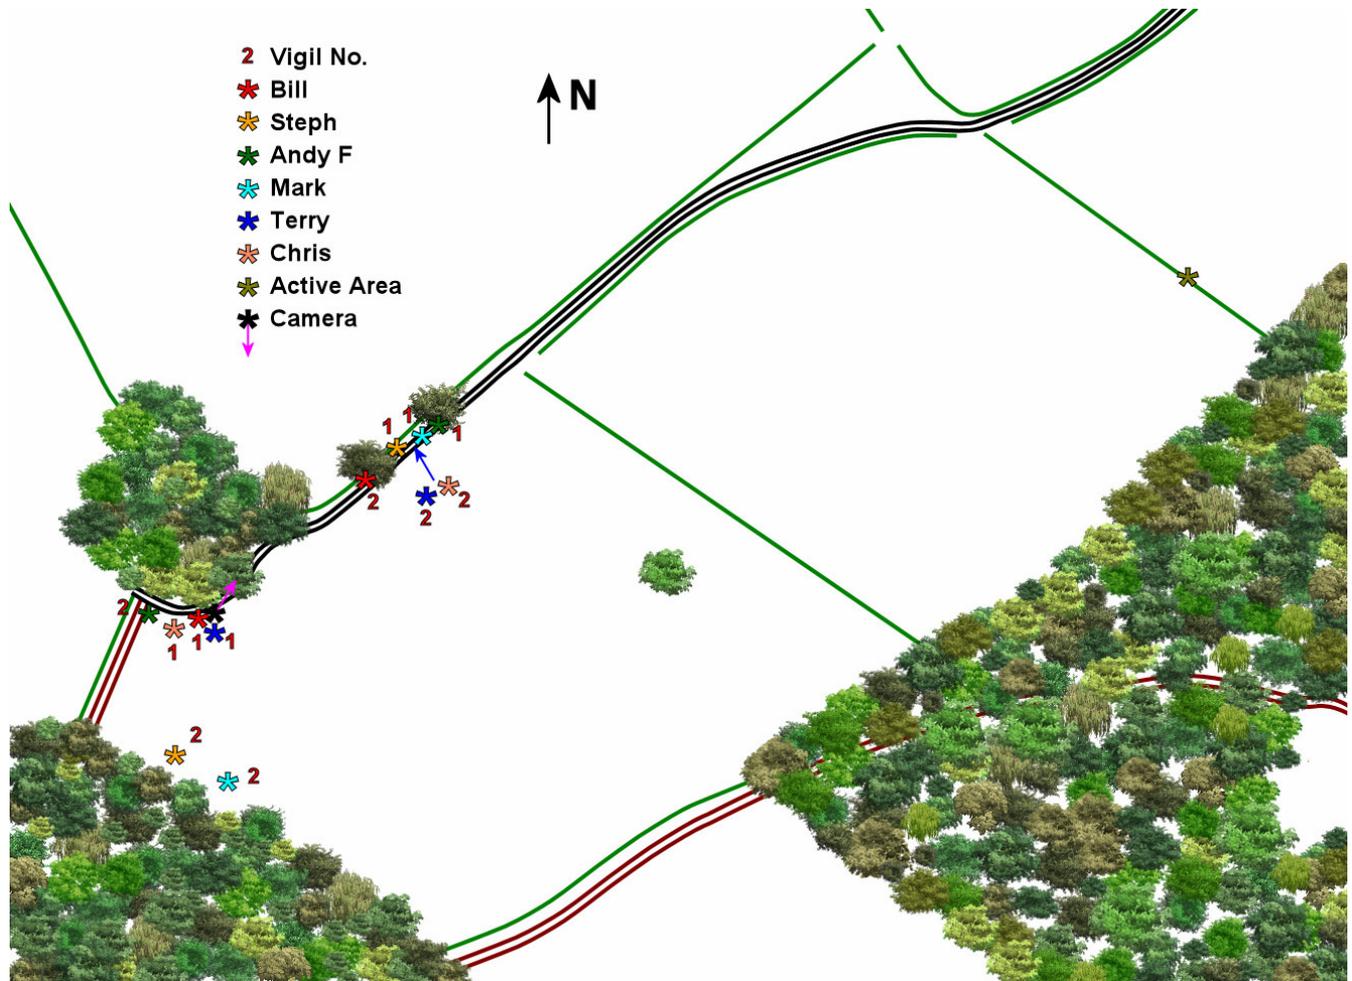

Investigation Site Bolter End, Hanover Hill

Investigation Date 31st July 2009

Mark sees the yellow lights again. He estimates these to be 100 to 200 metres away.

21:38 Steph notes that for the last few minutes she has had *Elizabeth I* repeating in her mind.

21.40 Andy hears animal noises in woods to his right.

Mark sees a figure on the edge of the field which appears to be in silhouette moving very rapidly, as if hovering just a few centimetres above the ground. It travelled about 100 metres in a matter of seconds. Mark was unable to judge size of figure as the distance was too great.

21:44 Steph picks up the name *Barrington*. She then gets *Square*. She wonders if these are linked as in 'Barrington Square'?

As Steph notes the above, she hears three short soft whistles on the path behind her.

21: 45 Andy hears the sound of someone whistling coming from the track ahead of him but does not see anything.

21:50 Mark sees a dark figure at edge of the field near the trees. He also sees a blue light estimated about a metre in size like a giant orb to right of trees, lasted a few seconds and thinks this may be Bill in Team 2 shining his torch as he does have a coloured torch.

INVESTIGATION REPORT – Team 1

Investigation Site Bolter End, Hanover Hill

Investigation Date 31st July 2009

After Vigil 1 Team 2 were asked if they had been moving around the area where Mark had seen the figure. It was confirmed that no members of Team 2 were walking around when Mark saw the figure moving across the field.

Vigil Two 22:15 – 23:00

22:15 Steph has the song *My Bonnie Lies over the Ocean* stuck in her head.

22:17 Steph records the temperature as +13 to +14°C.

22:21 Steph packs her equipment away and moves to the shelter of some overhanging trees as it started to rain.

22:31 Steph sees an electric blue and white light flash to her right. It was pale but seemed to cover a large area above her head height.

22:39 Mark hears a chattering sound behind him but it may have been an animal.

Andy did not see or hear anything.

Post Investigation

During the second vigil Mark was situated near the tree line and realised there were no houses directly beyond the trees which could have caused the lights he saw in Vigil 1.

Andy's DVD camera and photographs did not pick up anything. His sound recordings are currently being analysed.
