|---------------------------|-------------------------------|
| <b>Investigation Site</b> | Tring Park                    |
| <b>Investigation Date</b> | 4 <sup>th</sup> February 2011 |
| <b>Report By</b>          | Stephanie Lawn                |
| <b>Team Members</b>       | Steph, Adrian & Andrea        |

### Pre-Vigil

On their way to the first vigil site, the team experienced lots of incidents with wildlife including a bat. The wind was gusting so hard that any audio experiments would have been contaminated.

### Vigil 1: Bench below Bull's Wood – 21:08 to 22:00

For the positions of the team members see the plan on the next page.

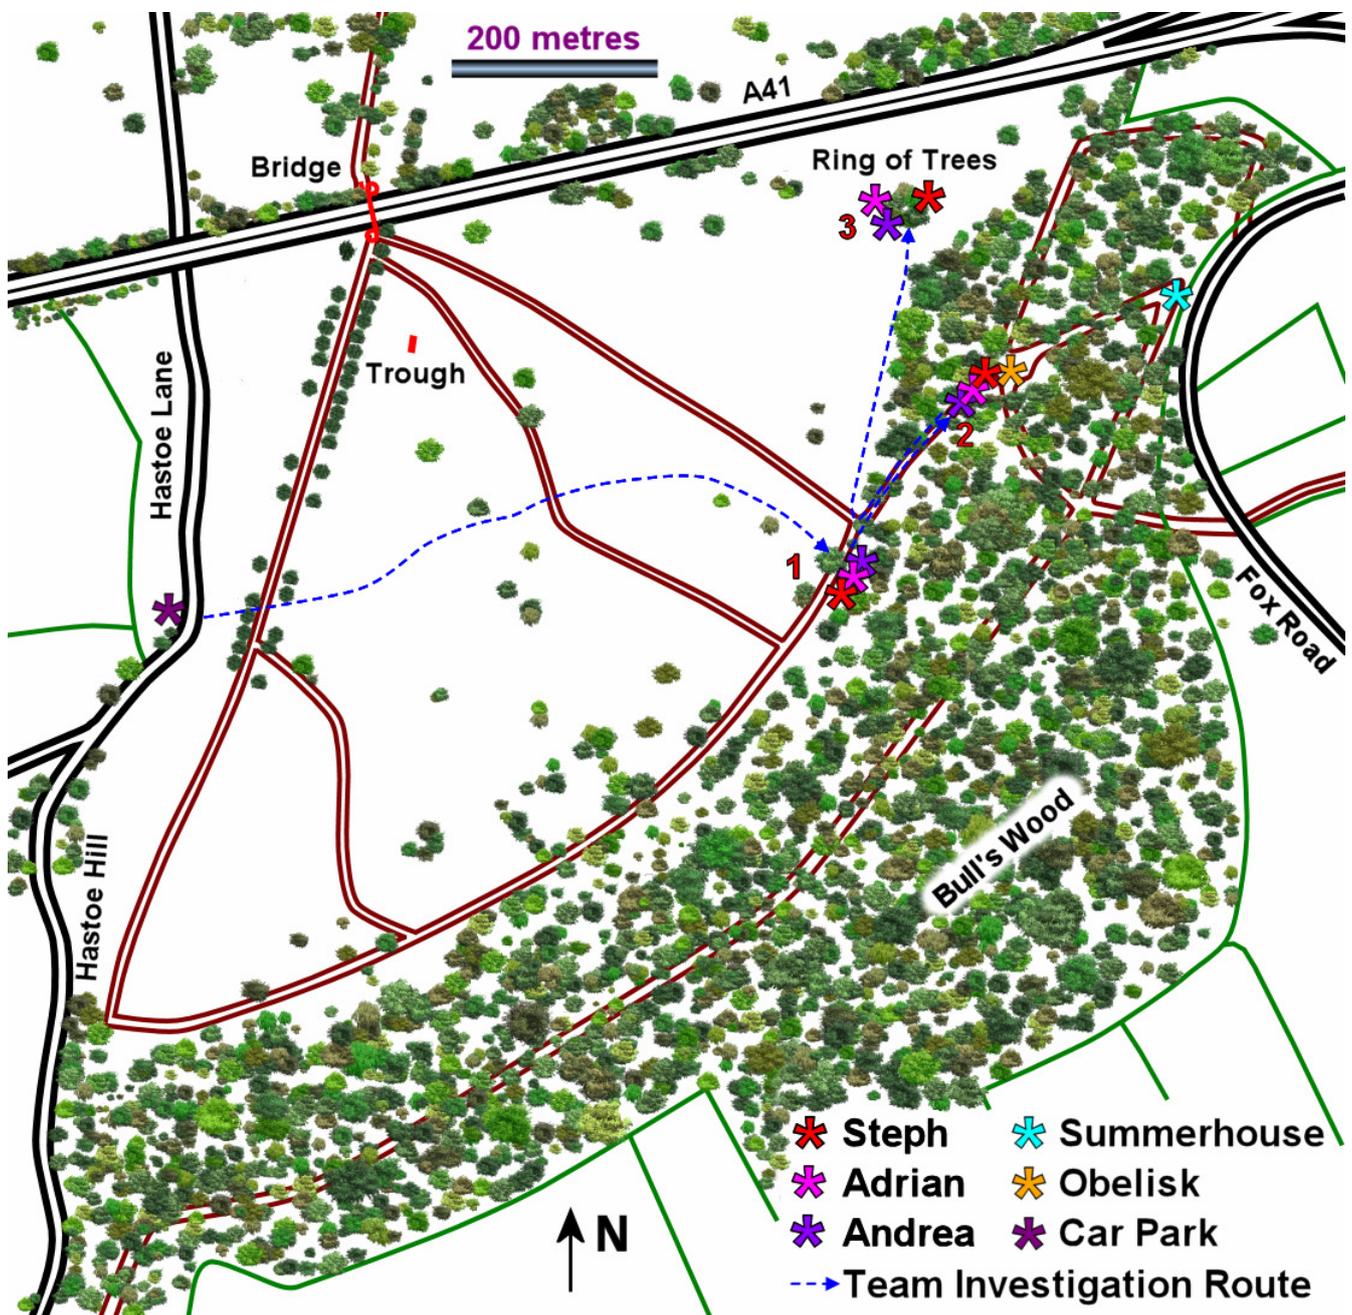

- 21:10 Steph measures the temperature as +7°C. She notes it is spitting with rain and very windy.
- 21:14 Adrian measure the ground temperature as +3.4°C.
- 21:15 Steph sees a flash towards the west-southwest of the park. Adrian asks if anyone had seen the flash as he had seen it too. Team discussed possibility of it being Team 3 on their way to the bridge.
- 21:16 Adrian's KII Meter registered 1.5mG.  
Adrian tried to take pictures with a Nikon D40 camera but it was too dark to focus.
- 21:17 Adrian saw two flashes of light seconds apart coming from the far-right end of the field, this may have been lights coming from the road.
- 21:21 Steph gets the impression of what seems to be some sort of emblem made up of solid circles. She gets this impression when she looks towards the area where the investigation team entered the park.
- 21:26 Steph sets her gauss meter up on the bench between herself and Adrian.  
Adrian measures the ground temperature at +7.4°C (a considerable increase from the first reading).
- 21:27 Steph measures the temperature as +8°C (this is done as Adrian had taken the temperature and stated the temperature had gone up).
- 21:37 Adrian measures the ground temperature at +7.9°C (a further increase in temperature).
- 21:40 Andrea sees a tiny beam of light down by the trees.
- 21:42 Adrian goes to investigate some trees further down the park as Andrea reported seeing lights.
- 21:44 Steph feels colder and measure the temperature which has increased yet another degree to +9°C.
- 21:46 Adrian went to investigate two bushes clustered close together in front of a large dead tree stump after Andrea claimed to have seen lights coming from the area. The KII meter did not register a reading above 1.5mG and Adrian could not find anything unusual. It was then believed that the lights Andrea saw were the quick glimpses of torch beams penetrating the woods behind us from the team investigating the obelisk.
- 21:48 Adrian used the Shack Hack with the headphones and the following words were noted – *Good afternoon, observer, you, celebrations and hands or Hans.*

# INVESTIGATION REPORT – Team 2

|--------------------|-------------------|
| Investigation Site | Tring Park        |
| Investigation Date | 4th February 2011 |

- 21:51 Steph sees the tree further down the path light up. The team discuss and observe and conclude this is torch light coming from the members of Team 1 who are just inside the wood behind them. Shortly after Steph sees a white dot of light which appears briefly between the two tree trunks.
- 21:58 Steph asks the team if they can see a dark shape between two sets of trees in front of them. The team discuss and use their torches. Andrea confirms that this is a small bush of some kind.
- 21:59 Adrian measures the ground temperature at +7.7°C.

### Vigil 2: The Obelisk – 22:09 to 23:00

For the positions of the team members see the plan on the last page.

22:08 Adrian measure the ground temperature at +7.9°C and his KII Meter registered 1.5mG.

22:11 Steph measures the temperature as +10°C. She places her gauss meter on the floor in front of her.

22:17 Steph sees a flash of light to the left of the obelisk. Team discussed that this could not have been another team's camera flash as it was too small and centred.

22:18 Adrian sees a single white flash come from between the left of the column and to the right of the summerhouse - from the direction of the woods.

Steph sees a large patch of light on the south side of the obelisk, as do the other team members. They can see that Team 3 are at the bench and further flashes confirm the light is coming from them but did not appear to be the cause of the earlier flash seen.

22:19 Adrian starts a Shack Hack experiment; he used the headphones and verbalized the words he heard as Stephanie asked questions - without Adrian being able to hear them. During this session the KII meter (that was positioned on the ledge around the bottom of the obelisk) gave a quick second level reading by illuminating the second light.

22:27 Steph measures the temperature as +10°C.

22:31 Steph hears noises to her left which sound like a knock of stone on stone.

Andrea uses the Shack Hack alone. The words that came through clearly were: *poor man, office, you think, Tim, kill, the games, niet* (Russian word for 'no', not sure of the spelling) and *justice for*.

22:35 Steph hears two more knocks. Other team members also hear this. Steph suggests it could be a tree creaking in the wind and distorted by the roar of the wind.

22:40 Adrian decides to use the shack hack and suggests an experiment where someone asks questions and he says the words that come through.

The first word to come out was *heavy*. After asking who is there the following words were heard by Adrian:

*Lucy* (After Steph asks what is your name?)

*Incriminating*

*Scandal*

*Which...are*

*Dear (deer?)*

22:45 Steph notes that Adrian and Andrea report a flicker to the second light on the KII meter that is on the obelisk. Steph did not see this as she was writing.

*Did that*

*Ja, Ja* (Said in two different voices, male then female)

# INVESTIGATION REPORT – Team 2

|                           |                   |
|---------------------------|-------------------|
| <b>Investigation Site</b> | Tring Park        |
| <b>Investigation Date</b> | 4th February 2011 |

(Steph asks if they can say more words in German)

*It's out of control*

*Everything, the family*

*Where do you come from?*

*Adrian, have you got the phone Adrian?*

*You people, get on the road* (Steph asks if we should leave)

*Adults*

*Australian*

22:50 Shack Hack session finished.

22:55 Adrian called out to see if any spirits were willing to go near the KII meter to make us aware of their presence – this proved unsuccessful.

23:00 Adrian measure the ground temperature reading+ 8.3°C.

## **Vigil 3: The Circle of Trees – 23:10 to 0:00**

For the positions of the team members see the plan on page 2.

23:10 Andrea sat alone against one tree as did Stephanie and Adrian. Andrea felt nothing throughout the whole vigil other than the wind blowing a gale.

23:17 Adrian measure the ground temperature +7.9°C. Adrian's KII Meter registered 1.5mG.

Adrian notes the wind in this area was so ferocious that it made investigating difficult – audio noises were impossible to register and the movement of the grass and branches made visual stimuli difficult to observe. Adrian divided his time by facing towards the road and then into the circle itself - he saw nothing unusual on this vigil.

23:18 Steph measures the temperature as +9°C and notes it is extremely windy and she cannot stand anywhere without being in the path of the roaring winds.

23:35 Steph stands towards the south-southwest and observes the park but does not see anything unusual.

## **Equipment**

|        |   |
|--------|---|
| Steph  | Digital Camera: Samsung PL81<br>Gauss Meter<br>Digital Infrared Thermometer: Tecpel DIT-512<br>Notepad & pen, torch and watch |
| Adrian | Digital Camera: Nikon DX40<br>EMF meter: K-II<br>Digital Infrared Thermometer<br>Shack Hack                                   |
| Andrea | Pen and paper   |

## INVESTIGATION REPORT – Team 2

**Investigation Site**

Tring Park

**Investigation Date**

4th February 2011

### Post Investigation

The flash of light that Team 2 saw at 21:15 was checked with Team 3. Team 3 were seated at their vigil site by the bridge at 21:13 so the light seen near the avenue of trees was not a result of any activity by them.
