

INVESTIGATION REPORT

Investigation Site	Bromham, Brookside Park
Investigation Date	16 th February 2013
Report By	Bill King
Team Members	Steph, Bill, Elaine, Andy F, Dee, Marion, Kate

Background

Kate (not her real name) moved into this home in May 2004. The home was brand new, but a row of old garages had stood on the plot previously. There may also have been an old toilet block nearby. The estate itself has been in existence since at least the mid-1960s. Prior to that it is likely to have been farmland as no buildings are shown in the immediate area on maps dating back to 1883.

Kate is retired. Kate, and her close family members, have no known health conditions or medication that might induce hallucinations, or other unusual sensory experiences (real or phantom). Kate is known to one of the LPS members present.

For the past few years Kate and close family members, have experienced several, sometimes frequently, recurring phenomena. These include:

- The sound of the front door opening (never closing again afterwards) as though someone has come into the hallway. This occurs on a very frequent basis (and EVERY time a particular family member is present). It does not happen at a set time and sometimes happens more than once a day. Whenever the sound is heard, investigation leads to the door being firmly closed or locked and no one has entered. In order to open the door, one has to physically pull the handle down. It yields a very distinctive sound (double-glazed with lever handle).
- The smell of cigarette smoke. Sometimes this is 'normal' cigarettes; sometimes it is strong like self-rolled cigarettes. According to Kate, when it occurs it is very distinctive. It has occurred at different times of the day. Kate is an ex-smoker, but has several deceased family members who were smokers.
- Unexplained breezes and light touches to the face and head. These have happened to Kate and one family member on several occasions.
- Occasional voices or unexplained noises inside the home. These occur fairly frequently and Kate has even been awoken from sleep on several occasions after hearing her name called out. Noises include knocks and footsteps in the hallway.
- Visual phenomena/figure seen in the peripheral vision. On turning to face the figure, it is no longer visible. This kind of experience has been escalating.
- Feelings of another presence close by in a room, but no one else is physically there.

General

The investigation location is on a well-established estate. The home consists of a bedroom, study (converted bedroom), living/dining room, bathroom, hallway and kitchen. The home has gas central heating, double glazing and is carpeted throughout (lino floor in the kitchen). There is a front door and a back door leading to a small garden area. At the front is a wheelchair ramp and gravel parking area to the side.

Pre-Investigation

Friday 15th February 2013: Marion spent some time thinking about Saturday's investigation asking her guide Michael for help. She picked up a little girl and continued to pick her up throughout the evening.

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

Saturday 16th February 2013: During the afternoon Marion is still picking up the little girl and does a yes/no session with her pendulum and help from Michael with the following results:

The little girl is grounded here. For some reason the child has not passed over. Marion feels the girl is very cold. She has the image (in her mind) of a small cold hand and part of a pinafore. The hand is wet she can see drops of water on it. Marion feels the child drowned. Marion feels this happened very quickly and that is why she didn't pass over and why she doesn't know what is happening. Marion brought a toy with her, a bunny, in the hope the child will come to it. She placed this in Kate's study.

When Bill and Steph arrived they joined the rest of the team in the mobile home for a chat and a cup of tea. After discussing with the owner how the night would be conducted, the team started to set up for the investigation.

20:38 Bill and Steph returned to Bill's car which was parked just to the south of the property to get their equipment. Bill was standing about a metre behind the boot whilst Steph was standing to Bill's left whilst she retrieved things from the boot of the car, when Bill distinctly heard the sound of someone walking towards them from the direction of the property. To Bill the sound was that of jeans clad legs rubbing together as someone was walking. He thought it was one of the team walking out to them so he looked towards the house after hearing three or four steps but there was no one there. He looked around but there was no sign of anyone in any direction. Steph had not heard the sound.

20:45 As everyone was setting up equipment Elaine has the image of a young girl dressed in a long grey pinafore dress and long mousey blonde hair.

Séance: Dining Area – 21:04 to 22:03

For the séance Dee, Kate, Elaine and Marion sat around the dining table whilst Bill sat in a chair to the southeast corner of the dining area. Andy was positioned in the living area to the south videoing the séance whilst Steph stood by the window in the west of the dining area videoing southeast towards the living area. During the séance Bill, at Dee's suggestion, videoed towards the front door from the kitchen, he also videoed along the hall towards the living area. Bill also placed his TriField Meter in the middle of the table and set it to SUM (magnetic + electric field). For the positions of the team members see the plan on the next page.

During the séance Andy used his sound recorder and monitored what was being recorded through headphones.

At 4m 48s into Steph's video recording she is looking at the screen and sees a small dark shadow coming from the doorway past the chair where Bill is sitting. It disappears before it gets past the chair.

The text below is taken from the members reports and is, in essence, just a summary of the séance. For the full text of the séance see the Bromham séance transcript.

21:05 Bill measures the temperature as +23.1°C.

21:09 Elaine reported feeling hot so Bill measured the temperature towards her from where he was sitting. Towards Elaine he measured +24.1°C, towards Dee +24.1°C and towards Andy +23.0°C. Generally it was 1°C warmer towards the dining area compared to the living area but not noticeably hotter towards Elaine.

21:12 Elaine reports that she is not feeling as hot, just light-headed. Bill measured the temperature towards Elaine at +23.8°C.

INVESTIGATION REPORT

Investigation Site

Bromham, Brookside Park

Investigation Date

16th February 2013

21:14 Marion reports feeling hot. Bill measured the temperature just to her left at +25.4°C and +25.5°C just to her right.

21:15 Two knocks are heard. Steph said they came from behind Elaine (towards the boiler in the kitchen) whilst Bill heard it over his left shoulder which was towards the living area door (and hence towards the door from the kitchen).

21:17 Bill remeasures the temperature next to Marion and gets +26.0°C just to her left and +25.5°C just to her right, an insignificant temperature change.

Steph can hear someone wheezing as they are breathing. It's like she is experiencing this in her own body but it isn't her.

21:27 Bill measures the temperature at +24.2°C towards Dee, +24.1°C to the left of Marion and +24.2°C to her right. The temperatures near Marion are the same as elsewhere and appear to be less than those measured at 21:17 but the former was measured quite close to Marion which may account for the higher temperature.

Steph suddenly feels cold around her right leg.

21:30 Bill hears a sound like the roaring of the wind over his left shoulder. Just after he hears it Steph reports seeing a white light over Bill's left shoulder.

Steph sees a short white-ish grey shape in the room behind Bill's head (he is sitting in the same chair). At this point Bill turns his head to look in the same place and says he heard something.

21:35 Bill hears the same sound, like a whooshing, that he had heard at 21:30 over his left shoulder. 15 seconds later the boiler in the kitchen was heard the come on but this had not happened at 21:30.

21:38 Steph feels cold on her right side again but this time it is down the whole of her right side.

21:46 Steph hears a noise which sounds like someone moving a plastic carrier back. This appears to come from the hallway.

21:50 A roaring sound is again heard by Bill but this time it sounded different and lasted much longer. This time it sounded like a distant car.

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

Steph sees a small grey mist moving swiftly towards the sofa at waist height.

21:51 Andy takes a temperature reading of +21°C.

21:52 Andy hears his surname through his headphones (yet to be confirmed on sound recorder).

21:54 Steph hears a loud breath from Andy's direction.

21:57 Steph's face becomes very tingly and itchy.

21:58 Elaine reported that she had gone cold on her left hand. Bill measured the temperature towards her hand at +23.8°C. As previously all of the temperature measurements were done from Bill's chair with the infrared thermometer held at arm's length and pointing towards the target which was typically a metre away. This temperature was not significantly different from previous measurements.

As Bill was writing the notes of the above paragraph he had to turn the page of his notepad over which involved pulling a page out from the security of the elasticated band that holds the unused pages secure and marks where he had got to in the pad. When he went to write on the page he found that the nib of his light-up pen had retracted fully into the barrel. He did not do this prior to turning the page and try as he might he could not get it to happen without a determined effort (retraction required rotation of the lower end of the barrel through 270° and could not be done accidentally).

21:59 Steph hears a shuffle sound that appears to be coming from the direction of the hallway.

22:02 Steph hears someone move over towards where Andy is sitting. It was like someone crossing/uncrossing their legs. She asks if it was him and he says it wasn't.

During the session Bill's TriField Meter needle twitched slightly but there was no other response.

During the séance Elaine comes over light headed, aching hands and hot, she had felt OK on arriving at the location. Elaine gets the name *Abbey, Abigail*.

Dee – Am hearing a very faint talking, anyone else hearing that?

Elaine – Sounds like children.

Dee – Yeah, exactly like children having a conversation.

Elaine – Sounded like the children talking was coming from behind, bearing in mind there is no children around the location.

Elaine has the word *sugar* come to mind. After a while Elaine leaves the séance as she starts to get pins and needles in her fingers and toes but later re-joins. As Bill went to say something Elaine sees the same little girl from earlier run past Bill's left and into the hallway.

Marion feels the little girl by her left side and gets a brief look at her as she rests the left side of her head on the table to look up at her. She was surrounded by a sheer veil of the most beautiful pale blue that sort of shimmered. She was being healed. As the séance started the child moved to the other side of the room to be with Michael. Marion feels the child doesn't understand what's happening and feels safe with Michael. She has a sweet little smile giving Marion a glimpse of the happy child she must have been. Michael has picked her up holding her in his left arm and she has snuggled up to him resting her head on his shoulder and left thumb in her mouth. She looks white and cold. In the bend of her elbow is a rag doll with long dangly legs. The child is so pretty with fair curly hair which comes down past her

INVESTIGATION REPORT

Investigation Site **Bromham, Brookside Park**

Investigation Date 16th February 2013

shoulders. She has a pale dress of a colour that doesn't stand out, perhaps cream or very pale lemon and this was covered by a crisp white full length pinafore with a frill round the neck and bottom. It would have been tied at the back. She had long white socks and dark shoes with a bar across. She is so sweet but very quiet watching us intently. Marion asks Michael if he can bring her closer and he replies that she doesn't want to, she is too timid. Marion feels this child is from the Victorian era.

Marion then hears a heavy breath over by Andy.

17 minutes into the séance Marion feels a light touch on the right side of her head.

25 minutes into the séance, when Marion asks the child if she can talk into the little red light she hears her say "What is it?" Marion explains but she won't come any nearer.

Shack Hack: Dining Area – 22:10 to 22:26

For this session Bill used his Shack Hack which was placed on the dining table with the amplified speaker placed in the headphone socket. Bill sat at the table whilst the rest of the team occupied chairs in the living and dining areas. For the positions of the team members see the plan below.

Initially the Shack Hack was set to scan through the FM range and several questions were asked but no discernible responses were obtained. Bill manually scanned through the FM range and found that very few channels were being picked up and those which were mainly had classical music on them with no speech. Manual scanning through the AM band produced more voices so the Shack Hack was set to automatically scan the AM band and questions were asked but there were still no discernible responses so this session was ended. Some of the notes below were taken from Dee's sound recording.

22:10 Bill starts the Shack Hack session with the question "Is anybody there?" There seems to be a response when "me" is heard from the box.

Immediately around this time, Dee and several members mention hearing what sounds like heavy breathing or moaning. Everyone thought it was Andy (poor Andy!), but it was determined that it was not. The sound went on for several seconds. Unfortunately, the Shack Hack is too loud on Dee's recording and the sound cannot be heard.

22:13 Elaine hears a low mumbling noise coming from the hallway.

Dee hears a noise that seems to come from out in the hall. Steph also mentions hearing the noise and says that her voice recorder is out

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

there, so she will be able to review it later

22:14 Steph hears a low voice mumbling over towards the fireplace to her left. She heard this clearly over the noise of the ghost box.

22:15 Elaine gets the name *John*.

22:16 Steph hears a bang coming from the hall area.

22:17 Marion hears *tulips*.

22:18 Marion hears a loud thump from the hall area and feels a big thump under her feet.

22:19 Bill switches off the Shack Hack as the reception is not good and no discernible words are forthcoming. Around this time, Marion mentions feeling a vibration under her feet that somehow seems to have emanated from the hall.

22:20 Bill switches on the Shack Hack, this time using a different channel. It seems little clearer than before. However, we persevere for a few minutes and when the question "Is there a message for anyone in this room?" is asked, it sounds to Dee as though Kate's name is mentioned. The name 'John' also seems to come out of the noise a couple of times. (Kate had a brother called John, who passed a few years ago.)

22:22 Steph hears a bang between her and Bill. She asks if it was him and he said he did not make the noise but felt it through his chair.

Elaine reported that the name *John* came out later on the voice box.

Ghost Radar/Ghost Speaker – 22:27 to 22:52

For this session Bill used the Ghost Radar application on his mobile phone. This uses the phones sensors to detect local changes in the environment then looks for patterns in that data which it uses to display anomalies in the environment and to determine words providing the possibility of a word being preselected by a spirit. For the position of the team members during this session see the plan on the preceding page.

During the session questions were again asked and the following words produced (written in the order in which they occurred).

22:27:57 Next

22:28:23 Hunt

22:28:36 Pair

22:29:02 Blood

22:29:28 Pennsylvania

22:29:41 Automobile

22:30:59 Fort

22:31:38 Consider

22:35:45 Parts

22:36:11 Heavy

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

22:39:26 Cowboy

22:44:51 Came

Some of these words were found to be relevant to Dee and Kate.

Elaine thought that maybe this person was something to do with the law, like a bounty hunter!

Marion is told by Dee that she has just heard someone say *Marion*.

Marion sees (in her mind) the little girl run back to her to show her the little basket she is holding. It is square with rounded corners and a long handle. It's not wicker but looks like it's woven from bleached rushes.

Dee says her left ear hurts.

Dee says that Fort is a family name but spelt Feurt.

Prior to the investigation starting Bill had been trying out his equipment to make sure it was working including the Ghost Radar and it had come up with the words *copper* and *leaf*.

22:28 Dee thinks she hears somebody calling "Marion". She experiences a brief shooting pain in her right ear, as she did in the séance.

22:35 Marion feels as if something soft is by her right foot, like a sleeping cat. She nudges it with her right foot but it doesn't move.

Dee notes how very quiet it is at this moment – not just the Ghost Radar, but the room also. It is almost TOO quiet, like the quiet before a storm.

22:39 Marion feels that Michael and the child are no longer in the room.

Steph gets the name *Mary*.

22:43 The boiler switches on.

22:44 Bill mentions that it has gone quiet again.

22:45 Dee suggests that the Ghost Radar word *Came* might be a way of saying "I came to talk tonight."

22:46 Bill tries the other version of the Ghost Radar application, which is similar. He mentions that it is flatlining and not detecting anything at all.

22:48 Marion (in her mind) can see the child walking away with Michael holding his left hand and swinging her little basket in her right hand. She is skipping, happy and carefree. Marion feels they have gone in the direction of the study but continued through there as they are walking through grass and trees.

22:50 Dee hears light 'bumps' over near the hall. She asks everyone if they are hearing bumps/bangs. Steph says she is hearing them and she then hears another at the other end of the house.

Dee notes that everything becomes exceedingly quiet – inside and outside.

EVP Session – 23:20 to 23:41

For this session most of the team placed their sound recorders on a small table in the middle of the team whilst Bill placed his on the dining table where he was sitting. In addition Bill left his TriField Meter in the middle of the table set to SUM and with it set to sound when the needle rose to 2% of the full scale.

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

During the EVP session Andy used his sound recorder and monitored what was being recorded through headphones. For the position of the team members during this session see the plan on page 5 of this report.

The session starts with team members asking various questions. Bill asked the first question followed by a 20 second quiet time then Steph asked the next question, again with a 20 second quiet time. This continued around the room with Marion, Andy, Dee, Kate then Elaine asking questions. This sequence was repeated 3 times.

23.24 Dee starts her digital voice recorder. Bill begins by explaining to Kate how to conduct an EVP session and instructs the investigation team on the sorts of questions to ask. The method chosen is for one person to ask a question then wait until Bill signals after a short silence for the next person to ask until each member has asked about three or four questions each.

23.28 Just as Bill is explaining what kinds of questions to ask and says "What's your name?" as an example, his TriField meter (on the dining table) alarm goes off, and Andy's K2 (on the coffee table at the other side of the room) lights up simultaneously.

23.29 As Bill resumes talking, a breath can be heard on Dee's recording. As soon as Bill finishes what he is saying, Andy mentions that just as Bill started talking, he heard a deep breath and it wasn't him (as he was facing the other way at the time)! Several other members then mention they heard similar sound earlier, including Bill.

The following is taken from Bill's recording of the EVP session.

23:27:58 The TriField meter sounds and the needle rises above the maximum.

Andy..... Yeah, I've got stuff here as well!

Dee Yay, someone's joining the party.

Marion..... That's good.

23:28:10 TriField stops sounding.

23:29:20 *Andy..... Just before you started talking I heard a deep breath...and it wasn't me...because the microphone's facing away.*

Marion..... Oh! Right.

Andy..... It was like somebody going [gives deep exhale].

Dee That's what we heard earlier.

General agreement.

Marion..... That's what we heard earlier.

Steph..... It was over there (indicates towards entrance).

Bill..... I heard it three times...come down...down there (indicates over left shoulder round corner, towards entrance to room).

23:30:14 *Bill..... Is there anybody here who would like to communicate with us?*

Response..... None.

23:30:38 *Steph..... Please can you tell us your name?*

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

Response..... None.

23:30:45 The TriField meter sounds and the needle rises above the maximum.

Andy..... EMF was going off over here too.

23:31:10 TriField stops sounding.

23:31:18 Marion..... *Is the little girl safe and happy now Michael?*

Response..... None.

23:31:44 Andy..... *What year is it?*

Response..... None.

23:32:04 Kate *Are you male or female?*

Response..... None.

23:32:25 Dee *How did you pass?*

Response..... None.

23:32:47 Elaine *How old are you?*

Response..... None.

23:32:52 The TriField meter sounds and the needle rises above the maximum. Andy's KII meter also reacts.

23:33:08 TriField stops sounding.

23:33:10 Bill..... *Did you used to live in the area?*

Response..... None.

23:33:34 Steph..... *Where...where were you born?*

Response..... None.

23:33:57 Marion..... *Is anyone from my family here?*

Response..... None.

23:34:19 Andy..... *Are you connected to any person in this room?*

Response..... None.

23:34:41 Kate *Is there a message for any person in this room?*

Response..... None.

23:35:05 Dee *Where did you pass?*

Response..... None.

23:35:27 Elaine *Do you visit here often?*

Response..... None.

23:35:48 Bill..... *What was your cause of death?*

Response..... None.

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

23:36:06 Steph..... *Do you have any brothers or sisters?*

Response..... None.

23:36:30 Marion..... *Why are you here?*

Response..... None.

23:36:50 Andy..... *Are you from Bedford?*

Response..... None.

23:37:10 Kate *Are you with your close family?*

Response..... None.

23:37:32 Dee *In which month were you born?*

Response..... None.

23:37:52 Elaine *Are you related to Kate and Dee?*

Response..... None.

23:37:54 The TriField meter sounds and the needle rises above the maximum.

23:38:07 Just as the TriField is starting to quieten there is a loud bang and it starts up again.

23:38:08 Dee *That's going off as well (referring to Andy's KII meter).*

Andy..... Yes!

23:38:23 TriField stops sounding.

23:38:25 Bill..... *Is it you that keeps making the TriField meter in front of me start whistling like it does?*

Response..... None.

23:38:55 Steph..... *Are you the person that keeps doing the same thing over and over in the house?*

Response..... None.

23:39:21 Marion..... *Were you born in another country?*

Response..... None.

23:39:43 Andy..... *Since you've only activated the meters when Elaine speaks do you only want to talk to Elaine?*

Response..... None.

23:40:11 Kate *Have you always had such a great sense of humour?*

Response..... None.

23:40:34 Dee *What did you do for a living?*

Response..... None.

23:40:54 Elaine *Is your name John?*

Response..... None.

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

At this point there is a strange anomaly on Dee's digital voice recording that will be referred for review. It is a short, high-pitched sound followed by what sounds like a male voice coming through an electronic device.

Dee asks if anyone can hear talking, because she thinks she just heard a voice.

23:41:13 Session ends.

Post-EVP Session

During the investigation the team had turned their mobile phones off but Bill had turned his on during a break before the EVP session whilst searching for an old map of the investigation site area. He had neglected to turn it off before the EVP session so he tested the TriField meter's response to it to see if his phone had been the cause of the meter responses. He turned the phone off and on and the used it to phone Steph and the meter did respond but it did not rise above 10% of full scale so it was not the cause of the meter response during the EVP session as the meter had risen beyond full scale.

Post-Investigation

Throughout the night Elaine was drawn to the eagle sitting on top of a cabinet near a large picture.

Marion tried to make a phone call on the way home but the fully charged batteries on her phone had drained.

Marion has been trying to find out something about this little girl with no success. There has been one drowning (a woman) in the mill pond a long time back but nothing of a little girl. So she worked on a map of Bedfordshire with her pendulum and the results were:

The girl didn't live in Bromham she was visiting.

Marion's pendulum gave a strong indication she was from Clapham. Marion feels this may be the reason the little girl just didn't know what was going on. She has tried to find anything concerning Clapham in Victorian times but there is very little on Victorian history on line.

Marion did a quick drawing of Michael and the child intending to do a copy later but this looks so like them both she decided to leave it as it was.

Ghost Radar: Information provided to LPS by Kate subsequent to the investigation shows an amazing (and definite) connection between 7 out of the 12 words given by the Ghost Radar.

It emerges that Kate had been working on a personal writing project that morning and had been experiencing problems with Microsoft Word. In order to help explain how to do something, her daughter asked her to pull up a document at random to use for demonstration purposes. The document chosen at random just a few hours before the investigation was a chapter of the writing project which told of a journey experienced by Kate and her late husband in America. For reasons of privacy, the details cannot be published, but the words HUNT, PENNSYLVANIA, AUTOMOBILE, FORT, PARTS and COWBOY can be directly linked with this document.

There is also the possibility that the words PAIR (as in couple), CONSIDER (maybe another way of saying 'thinking about') and CAME can be connected.

With regards to the word BLOOD, Kate told LPS that about an hour before they arrived, she had been reminiscing with her daughter. The subject of the conversation was the daughter's birth and the rare

INVESTIGATION REPORT

Investigation Site Bromham, Brookside Park

Investigation Date 16th February 2013

blood disorder she was born with, which required several blood transfusions. This was the part of Kate's personal writing project that she had been working on THAT MORNING.

No definitive connection is made between the words NEXT or HEAVY.

Dee's conclusions concerning this investigation are as follows:

- The séance yielded some interesting results, particularly the two 'knock-knock' occurrences.
- The Ghost Radar session yielded some very interesting results. It is almost possible to rule out pure coincidence when considering that the unusual selection of words spoken by the device were so specific to Kate.
- The EVP session yielded very interesting results with the simultaneous setting off of the meters in seeming response to questions. As the intervals between the meters going off were not regular (i.e. 3, 2, and 5 minutes) it is fair to suggest that this was not caused by something electronic in the house. Interestingly, the meters had not behaved this way prior to this session.

Equipment List

Andy Digital Camcorder: Sony DCR-DVD306E
 Digital Infrared Thermometer: IR-102
 Digital Voice Recorder: Olympus WS-560M
 EMF meter: K-II

Bill Amplified Speaker: Hama Mini Stereo Speaker
 Digital Camcorder: Sony DCR-HC14E
 Digital Camcorder: Sony DCR-SR90E
 Digital Infrared Thermometer: Karknee DT-300
 Digital Voice Recorder: Olympus WS-560M
 Electrosmog Meter: Cornet ED-7
 EMF Detector: TriField Natural EM Meter
 Infrared Light 48 LED
 Li-ion Battery: Mingtongda T-1248A
 Shack Hack: RadioShack 12-489
 Video IR Light: Sony HVL-IRM
 Notepad, pen, torch and watch
