Location - Nettleden

Pre-Investigation - Objection from local resident to LPS investigation

Prior to our investigation at Nettleden. LPS was contacted a number of times by a local resident who informed us that our planned investigation at the bridge at Nettleden would cause problems for local residents by attracting unsavoury characters from the local public house and youths who congregated under the bridge at night. As a precaution to prevent disruption to the local resident who was opposed to LPS investigating an area where incidentally there is public access and in order to minimise any impact on the local community from our investigation. LPS chose to change the date of the investigation in case of any disruption that could have been caused to our planned investigation on the original planned date by said local resident and any local youths.

The result was a trouble free investigation and we never saw anyone from the local community both under the bridge or further up the lane. At no time did LPS members investigate the top area of the bridge as permission to do this had been denied by said local resident. While LPS was not obliged to contact this resident, upon receiving emails that were, to say the least nimby in nature. We did complete our investigation without any disruption to this resident and maintained communication with them prior to the investigation. At this time LPS has not received any further communication from this resident and has chosen not to place their emails on our website to keep the identity of this resident safe from the public domain.

General

Weather,

Clear skies, cold.

Ambient sounds

Lambs nearby in the field.

 Digital Camcorder: Sony DCR-DVD306E
 Digital Voice Recorder: Olympus VN-480PC
 EMF meter: K-II
 Digital Infrared Thermometer: IR-102
 Notepad & pen, torch and watch

INVESTIGATION REPORT

Investigation Site

Nettleden

Investigation Date

18th March 2011

Experiment.

Members of the team were each asked to walk down the lane to the bridge and then back up the lane on their own to see if they experienced anything. When Andy walked down the lane he sensed nothing until he got to the bridge where Andy had a sensation of feeling uneasy under the bridge. This soon passed as Andy left the area

Pre-Vigil

Andy is located away from the bridge itself and is filming the team under bridge.

Vigil 1: 22.00-22.30 – Nettleden Bridge

22.01: Andy hears a dog barking

22.02: Andy hears a whistle that is coming from further up the embankment behind him

22.10: Andy takes an EMF Reading but there is no activity.

22.26: Andy can hear someone speaking from under the bridge and presumes this is one of the team.

Pre-Vigil

Andy and Elian are sat in a location next to some metal gates in the lane.

Vigil: 22.50 – 23.30

22.55: Andy hears a sigh near him

23.06: Andy hears someone whistling.

Post-Investigation - Andy

EVP

Andy does not have any EVP on his sound recordings.

Film

Andy has recorded audio on his film footage of a loud thump being heard coming from behind the team. There is also footage of a strange light on the ground in front of the team. However Bills torchlight is observed shortly afterwards beaming down on this location and therefore it must be assumed that Bill was taking a temperature reading and this would also account for two lights seen in the bushes down the lane shortly afterwards that may also have been Bills light. The camcorder has also picked up the sound of some one whistling in the lane nearby, which is strange given that the sound recorder did not pick this up.

Photographs

Andy did not pick up any paranormal activity on his camera apart from an orb in motion near the Bridge.
