

Nuthampstead Airfield

7TH August 2015

Summary

The team investigate an area where they are not wanted and are not welcome, an area reserved only for the dead and for those still not at rest but wanting peace from the living.

As a result LPS encounter disembodied voices from another time? Dark spectral figures seen in the trees, A ghost from the 17th Century who enjoys the name of "cut throat" for grisly reasons as he appears to have been the local highwayman and now views himself as the leader of a lost band of spirits from different centuries who all reside in this area.

Using an Olivus three as part of the investigation the team get the following words "Base" "Spring" "Alphabet" "Fly" "Cold" all of which could link to the airbase as well as the name "Anthony" which the Olivus repeats three times in a row all very strange as well as other encounters
