

INVESTIGATION REPORT – Team 2

Investigation Site	Amphill, Houghton House and Segenhoe, All Saints'
Investigation Date	25 th November 2011
Report By	Stephanie King
Team Members	Steph, Richard and Nathan

Amphill, Houghton House

Vigil 1: Basement – 21:30 to 22:00

For the positions of the team members see the plan on the right.

- 21:32 Steph measures the temperature as +10.3°C.
- 21:33 Richard has a cold shiver down his back.
- 21:36 Steph notes it is quite calm and that there is only a gentle breeze. She can hear cows mooing and leaves outside the doorway blowing along the dirt floor. She thinks the sounds were like footsteps at times.

There is an ornament or storage space built into the wall where Nathan is positioned for the vigil, which he is strangely drawn to on occasion for some reason.

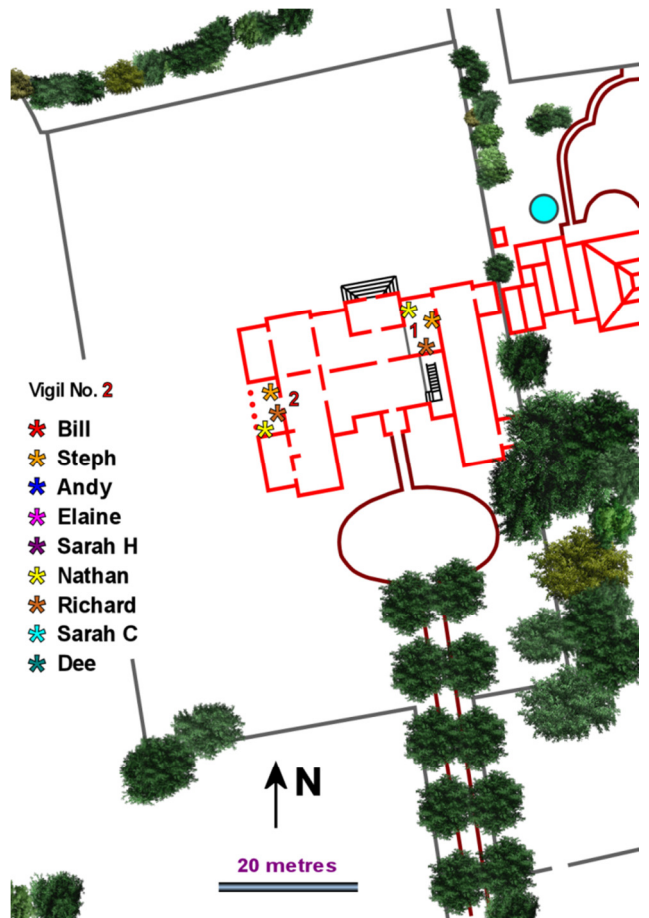

Richard's right hand is boiling hot, but not the left. Left hand is measured at +18°C, while the right is at +21°C.

- 21:38 Steph hears classical music playing in her mind. It's being played on a piano and it keeps fading in and out.
- 21:40 Nathan hears noises coming from off in the distance that sounds like animals which could have been farm animals. Nathan is drawn to the window and corner behind him where he is seated and feels like he is being watched, or that he senses that a figure may be standing behind him looking over him.

- 21:41 Steph hears a voice and a dog barking and thinks this is coming from the house next to the site.
Richard hears a dog barking. Richard senses a black shadow just halfway up the wall roaming in between the two windows toward the door.

- 21:42 Steph hears a knock in front of her (to Nathan's right).
Nathan feels slightly dizzy at this stage of the vigil which he cannot explain but this passes and is only momentary.

- 21:45 Nathan hears what appears to be a sound like dogs barking nearby. He still feels that from time to time he is being watched from behind him and feels the need to turn around to check this but sees nothing.

INVESTIGATION REPORT – Team 2

Investigation Site	Amphill, Houghton House and Segenhoe, All Saints'
Investigation Date	25th November 2011

- 21:47 Steph feels that there is a male presence in the room with the team.
Richard senses two people standing (or bending over) a small table, of sorts, on the right hand side of the room.
Nathan uses an EMF meter in the wall storage space for a short time but no indicator lights are activated, no reading.
- 21:49 Steph notes that the room appears to have gone very dark all of a sudden.
Nathan notes there is little or no wind within the room and the temperature remains constant.
- 21:50 Faint whistle and a breeze whistled past Richard's ear.
- 21:51 Nathan thinks he sees two areas on the wall behind Steph that momentarily showed as white circles about a metre apart from each other and quickly disappear.
- 21:52 Out of the corner of her eye, Steph sees a tennis ball sized dull orange glow in the doorway to her right.
- 21:53 Richard's left leg is shaking uncontrollably for a few seconds.
Nathan gets the impression from the room that this may have been a focal point for people to gather in and be popular for meetings.
- 21:56 Richard appears to hear a faint whisper? (May have been team member?)
- 21:57 Nathan hears cows in the distance and rustling leaves due to a small amount of wind that has started. Nathan sees a brief light high up on the wall opposite to him, which may have been from distant traffic.
- 21:58 Richard hears a faint scraping noise.

Vigil 2: West Loggia – 22:07 to 22:40

For the positions of the team members see the plan on the preceding page.

- 22:07 Steph places her gauss meter between two pillars to her left.
Richard measures the temperature at +5°C, with a maximum of +7°C.
- 22:10 Nathan takes an EMF reading on the window area above where he is seated but the result returns as negative, no detected reading.
- 22:12 Steph notes that it is much windier and colder here.
- 22:15 Steph hears a voice and asks Richard if it was one of the team radio's. Nathan says it was playback on his voice recorder.
Richard notes Nathan's voice recorder makes a loud audible noise.
Nathan hears a moaning noise which was brief and deep sounding from behind him in the adjoining room.
- 22:24 Richard feels as if he was brushed past by something on his right-hand side.
- 22:25 Nathan hears thud noises from the room behind again. No further sounds heard after this time.

INVESTIGATION REPORT – Team 2

Investigation Site	Amphill, Houghton House and Segenhoe, All Saints'
Investigation Date	25th November 2011

- 22:26 Steph notes that this area of the house gives off an odd feeling to her, like it's on display. She wonders whether items were displayed or plays were performed here but she's not exactly sure. She definitely feels there is some kind of showing here.
- 22:28 Richard feels a brush or touch on his right ear; and also momentarily feels warmer than the current ambient temperature.
- 22:30 Richard hears two knocks, but unable to ascertain where they came from.
Nathan hears distant noises like banging against walls or similar sounds and could have been from nearby houses. Light was seen by Nathan on the pillars but this may have been from traffic nearby.
- 22:36 As Steph is looking near the far right pillar (looking from the inside of the loggia) she sees a small dark shape moving. It looked to her like the silhouette of a bird flapping its wings.
- 22:37 Richard has another cold shiver down his back.

Segenhoe, All Saints' Church

Vigil: Inside All Saints Church – 23:40 to 00:15

For the positions of the team members see the plan on the right.

23:40 Steph places her gauss meter on the base stone of where the font once stood.

Richard measures the temperature as +4°C.

23:45 Nathan notes an occasional gust of wind blows inside the room and the temperature remains constant and fresh. There is a clear sky with stars visible and bright moonlight.

23:48 Richard spots a just off black shadow on the wall to the right of the gate.

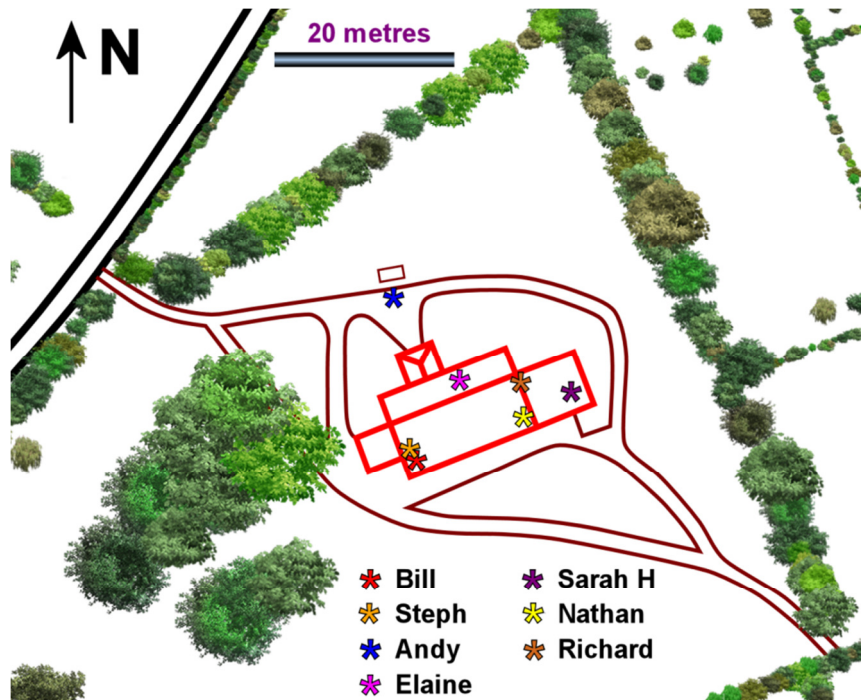

23:50 Steph feels a bit giddy but very relaxed. Her lap feels warm like there is a cat sitting on it.

Nathan decides to take one last EMF meter reading on the floor just in front of him which lasts for one minute approximately, but no detection is made.

23:55 Cold shiver down Richard's lower left arm and elbow.

Nathan notes it's very quiet and still constant fresh temperature within this main room.

23:56 Steph has a sudden cold shiver that leaves her tingling all over.

INVESTIGATION REPORT – Team 2

Investigation Site	Ampthill, Houghton House and Segenhoe, All Saints'
Investigation Date	25th November 2011

00:00 Steph sees a dark figure standing and moving around and she think this is Rich looking at/for something as it is in his direction. The figure is there for a few seconds then disappears and Steph can see Richard sitting in his chair and has not moved.

Richard hears a whistle or "ahh" type sound to his left.

Nathan hears distant chimes to signify the stroke of midnight bells ringing and notices that as this happens the wind suddenly picks up, which it hadn't done since this vigil began. The wind dies down again shortly after the bell chimes stop.

00:02 Richard senses another black shadow quite low down again over at the right wall near the door; perhaps less than a metre in front of it at best.

00:05 Steph closes her eyes and concentrates. In her mind she can see a circular metal grate set in a stone floor. She looks through the grate and can see what looks like a chamber below. The chamber is not that deep and appears to be lit. Steph can see some water on the chamber floor (more like a puddle).

00:07 Sudden warm feeling - considering the ambient temperature - is felt on Richard's hands.

00:12 Richard feels very light headed and rather hazy. He also noted Elaine dropped something which made a clunk and a whispered "sorry."

00:13 Steph gets the impression in her mind of a monk standing where Richard is sitting.

Equipment List

Steph Digital Camera: General Electric E1480W
 Digital Voice Recorder: Olympus WS-560M
 Gauss Meter
 Notepad, pen, torch and watch

Richard Digital Camera: General Electric E1486TW
 Digital Voice Recorder: Olympus WS-210S
 Digital Infrared Thermometer: Fluke 361
 Notepad, pen, torch and watch

Nathan Digital Camera: HP Photosmart R707
 Dictaphone: Olympus PearlCorder S925
 Mobile Phone: Sony Ericsson Neo
 EMF detector: ElectroSensor
 Dowsing Rods
 Notepad, pen, torch and watch
